THE REDCLIFF REVIEW TUESDAY, MARCH 3rd 1932

Number 21

Diamond D Girls Have Successful Social

Attracts One of Biggest Crowds In Many Months

If the young men of Redcliff are apt pupils they had a glorious opportunity to get a few pointers on how to run a what drive and dance successfully if they attended the Leap year event put on under the auspices of the Diamond D football girls in Cliff Hall last Monday evening.

It is some time since this hall was so taxed to accommodate the large crowd present for the occasion, but so well was everything managed by the girls under the direction of Miss Fieda who acted as M. C. that the crowding was unnoticed and the dance went merrily on. As proof of the good time every one was having, the crowd stayed to the finish. There was no thinning out of the crowd as is customary.

The evening program opened with a whist drive, which was closely contested to the finish. Miss Irene Buchholz won the ladies first prize and Miss McGowan the consolation. The game first was won by Sam McCleary and D. Phillips got the consolation.

During the evening a spot was introduced. The prize for this was won by Mr. R. Bell and Miss May Goodwin.

At midnight an appetizing lunch was served. This had the effect of stimulating all for more dancing and many remarks were heard when the Home Sweet Home waltz was announced.

On the whole the event was a great success and the girls received unstinted praise for the manner in which it was conducted.

BIG NEW ELEVATOR FOR WINDSOR ONT.

Construction of a two million-bushel grain elevator on the Detroit River waterfront at Windsor, Ont., will be started immediately, according to the industrial Department of the Canadian National Railways. It will cost \$1,257,000 and will be built in two units of 1,000,000 bushels each. The whole building will be 403 feet long and will have a plant capable of handling 25,000 bushels of wheat per hour.

SERVICE MEN FOR PEACE RIVER DISTRICT

J. D. Campbell, secretary of the Peace River service men's Association has informed members of the Service Men's Unemployment Association of the proposed immigration to the Peace River country, and has received its support.

The Peace River Association was formed recently to start "back to the land" movement in the Peace River district, men here intending to form their own townships. They have petitioned the federal government for financial aid.

A motion to appoint a committee to investigate means for state medicine was passed in the legislature yesterday.

MASSEY DISCUSSES MANCHURIAN CRISIS

"The trouble in the Orient has developed into more than a controversy between Japan and China for it threatens to become a conflict between nationalism and internationalism," declared Hon. Vincent Massey, Toronto, on his arrival in Winnipeg over Canadian National Railways following the completion of a lecture tour of all the important cities in Western Canada, in which he spoke to Canadian Clubs on the subject of the Manchurian crisis. "The natural method of conciliation between the two warring Oriental nations would have been an appeal to the international organizations that function for this purpose, but Japan has preferred to use her own methods of force in attempting a settlement," said the diplomat.

CENTRAL BANK IN CANADA SUGGESTED

Investigation of the entire credit and currency system of Canada will be made before the regular 1933 revision of the banking laws, Premier R. B. Bennett told the House of Commons. Establishment of the central bank, possibly to work in close harmony with the Federal Reserve Bank of United States will be considered.

HAND IT IN

If you have a bit of news, Hand it in;
Or a joke that will amuse, Hand it in;

A story that is true, Or an incident that's new, Will your story make us laugh? Hand it in;

Never mind about your style, If you think it's worth your while, And will make our readers smile, Hand it in

How is Your Subscription?

Additional Items of Local Interest

Mrs. A. E. Ward returned home Monday after spending a month visiting her parents in Edmonton.

Mrs. Jas. Horne and little son, of Edmonton arrived in town last week to join Mr. Horne who is now on the Glass plant staff.

Mr. and Mrs. F. Kelleher, Mr. and Mrs. H. Leppard and E. T. Cooke attended the L.O.O.F. and Rebekah Grand Lodges in Calgary last week.

Hector Lang M. L. A. of Medicine Hat and W. C. Smith M. L. A. were guests in the Cornhill Hotel Edmonton, when it was destroyed by fire last Saturday night. They escaped with only what clothes they had on.

The \$5,000,000 issue of Alberta bonds which was put on the market last Monday was oversubscribed by fifteen million dollars by noon of the same day. Alberta's credit is apparently still good.

With the exception of the chimney shop department, the Dominion Glass plant was closed down Monday. The plant will remain closed only for a week or ten days to enable the officials to make some adjustments and improvements in the factory.

If there is any truth in the old saying about March coming in like a lion there is every indication of it going out like a lamb. The month was ushered in with a blizzard in several parts of the province and several inches of snow. There was a decided drop in the temperature here accompanied by snow flurries.

The Review learns that during the past week a number of dogs in town have been poisoned.

Circumstances indicate that the poisoning had been done, deliberately and an effort is being made to locate the guilty party. It is a very mean and dangerous practice to set out poison as it often happens that it is picked up by children.

A clinic will be held in Gordon Memorial school room on Wednesday, March 9th at 1 o'clock p. m.

As the entire Review staff was confined to the house most of this week, suffering from severe colds the paper is late than usual.

Miss Francis Buchholz has been engaged to teach the Harvest Vespers at the church on April 4th.

St. Mary's Altar Society will hold a whist drive, sale of work and home cooking in the I. O. O. F. Hall, on Thursday, March 17th, commencing at 3 o'clock in the afternoon. The Society is also making arrangement for an old time dance to be held on Easter Monday, March 28th.

If it is quality you want to buy it at Shortys place. It is the River Side crisp crust 18 or 16 leaves; that's the A. Cream Loaf, Brown Raisin, Hearth, the kind that make mother jealous, 6c per loaf. All quality cakes at 15c per doz. At Harry's Place.

A quiet wedding took place at St. Barnabas church, Medicine Hat, last Monday, Feb. 29th, when Mr. Robert Johnson, son of Mr. and Mrs. Harry Johnson of this town, was united in marriage to Miss Mable Hatley, the youngest daughter of Mr. and Mrs. John Hatley of Medicine Hat. Rev. Canon Western performed the ceremony. Only immediate friends attended. The young couple will reside here.

Here and There

The railroads cannot continue to pay a million dollars a day in taxes, they cannot pay interest on their bonds; they cannot buy new equipment unless they raise the money. In putting the railroads in a sound, money-making position we are aiding the whole country, says the Journal (N.T.) Tribune Times.

Montreal witnessed an unprecedented invasion from Quebec on the first weekend of February, when over 5000 men, women and children, drawn from all ranks and classes, arrived on the three dollar return Canadian Pacific excursion from the Annapolis Capital. Four special trains were used.

Seated on a glittering throne between two huge natural loggers, Miss Margaret Stevenson, of Edmonton, in her role as Colonial Queen and assisted by The Honourable Lieutenant-Governor W. L. Walsh, opened the 18th Annual Great Winter Sports Carnival at that Canadian Rockies resort, this month.

The appointment of W. R. Patterson to be General Auditor, Canadian Pacific Railway, has been announced, effective January 1, over the signature of E. E. Lloyd, Comptroller, in succession to G. C. Gibson, who died recently. Mr. Patterson, is one of the foremost railway executives on the continent.

Plans for a national championship for games and woodcock drives are under way and Brunswick is considered as the possible locality for staging the event. Field estimates held in the United States recently held a meeting to discuss the championship and were greatly influenced by the advice of Court Bailey, well known sport writer, who previously advocated the claims of New Brunswick.

Indication of the contribution made and being made to civilization by the engineering profession was demonstrated at the 46th annual convention of the Engineering Institute of Canada held at the Hotel York Hotel, Toronto, recently. A very wide variety of topics formed the basis of discussion and the convention at which the most outstanding men in the profession were present.

A little brown big leg Grand Prix, recently, as a long jump, was sent to the Land of Old. Unlike the brown big of the old, it did not contain any of anything likely to excite the Old. It was a small, fast, and from the historic well of Brangar, the Grand Prix Memorial Park, site of the birthplace of Long-jump, will be used to christen the new 10,000 ton steamer "Canada" to be operated on the run between New York and Vancouver, N.S.

Since the sport that has had the greatest growth of any winter activity in the past decade, reaching its peak this year with thousands of skiers tramping out to the Laurentians, north of Montreal, every weekend. Special trains are put at their disposal by the Canadian Pacific Railway. Similar week-end outings are encouraged by this railway as all the great centres of popularity and it takes a major place in all sport menus across the continent.

Travelers in Canada at present will have the benefit of the same ticket privileges as were granted them at Christmas, according to a recent announcement made by the Canadian Passenger Association on behalf of the Canadian Pacific and Canadian National Railways. This concession will be in force and a quarter for round trip generally to the travelling public between Thursday, March 24 and Sunday, March 27 with return available up to Tuesday, March 29.

Fifty-seven 16-year leases of salmon and trout fishing rights, lakes and streams in New Brunswick will be put up to public auction at the Parliament Building in Fredericton, April 7 next. At present prices ranging between \$25 per acre and \$12,000 per annum, is the announcement of Hon. P. F. D. Tilling, Minister of Lands and Mines. They represent the pick of salmon fishing in British Columbia on the side of the American continent.

At the close of a meeting of the directors of the Canadian Pacific held at Montreal, February 6, President E. W. Beatty announced that in order to help western farmers over the present period of depression the Company has offered to sell on credit to farmers for the year 1931. This offer will be extended to the year 1932 on condition that the contract holder pay his taxes and all installment on his contract. Further encouragement in the form of a bonus will be given to those who make payments on account of arrears of interest, the bonus to be in proportion to the amount of interest paid. The great assistance to contract holders in the form of a bonus will be given to those who make payments on account of arrears of interest, the bonus to be in proportion to the amount of interest paid. The great assistance to contract holders in the form of a bonus will be given to those who make payments on account of arrears of interest, the bonus to be in proportion to the amount of interest paid.

EMORANDUM FOR THE NEW INCOME TAX

By its new income tax the provincial government expects to raise a total of \$1,574,000 the last year. Each person filing a return must pay \$3 as a filing fee, such sum to be subject to a state if the filer is not required to pay under the proposed exemptions.

The exemptions proposed are \$750 for single persons and \$1,200 for married, with an additional exemption of \$400 per annum for each dependent.

The rates start with one per cent on taxables up to \$2,000, two per cent, from \$2,000 to \$4,000, three per cent, from \$4,000 to \$5,000, and one per cent per thousand dollars taxable income thereafter with a maximum of 25 per cent.

Churches

MARY'S CHURCH
Celebration of Mass every day of each month except first Sunday, at 8:30 a. m.

ST. AMBROSE CHURCH
Rev. Michael Stokart, vicar
8 a. m. Holy Communion
10 a. m. Sunday School
1st and 3rd Sunday
11 a. m. Church Eucharist
2nd, 4th and 5th Sunday
11 a. m. Mattins and sermons
8:30 p. m. Evensong and sermons

ORDON MEMORIAL UNITED CHURCH

Pastor Rev. R. Erskine Fox
11:15 a. m. Morning Worship
Subject: "The Vine and Branches"
7:30 p. m. Evening Worship
Subject: "The Raw Material of Human Nature."

"But you will see me because I'm here and you will be living too."

Rev. Geo. G. Webber, of Calgary, secretary of the I. M. S. Day of Prayer of Canada for Alberta and British Columbia, will occupy the pulpit on the evening of Sunday, March 13th.

Strathmore Farm Holds Three Milk and Butter Production Records

When milk and butter are the topic of conversation, attention must be directed to the Canadian Pacific Railway's supply farm at Strathmore, Alta., where three bordering production records for 1931 for the Province of Canada. There is little to show in the three cow's pictures with the story. Excellent stock well handled, has once more proved its worth and it is W. Jones, the company's Superintendent of Agriculture and Animal Industry, is justly proud of the achievement.

Mona Pontiac Walker, 1931, for the Dominion of Canada, having completed a yearly record on November 27, 1931, with 50,000 lbs. of milk and 1,100 lbs. of butter. In 1930, as a four-year-old, she held another record, with 49,500 lbs. of milk and 1,071 lbs. of butter. The best high milk production record for 1931 goes to Princess Lily McDonald, who also held the butter record for 1931 for the Dominion of Canada, with 23,271 lbs. of milk and 1,210 lbs. of butter. She is a registered cow and first prize in the dairy class at Vancouver and Victoria in 1927.

The four-year-old production record for Canada, for both milk and butter is held by Strathmore Lady McKinley—143,998—recorded her records under Government regulation, in 1931, with 50,000 lbs. of milk and 1,100 lbs. of butter. She is a remarkably fine one of the best of Holstein pedigree, as is shown by her fine lines.

The Pictures

Incredible Airplane Speeds

Predicted That a Speed of 740 Miles An Hour Is Not Unattainable

Now that an airplane has been driven at over 400 miles an hour, engineers are wondering just how fast man can fly—whether there is any physiological reason to suppose that the human body is not capable of speeds much greater than those so far attained. The pilots who took part in the last Schneider cup race, when the world was broken, felt no discomfort on a straight course apart from the deafening roar of the engines. For a second all became black before their eyes when they swirled around a pylon, but they never lost their maneuver, since the stresses set up in the airplane at 400 times an hour are nine times as great as at 133 miles, the racer must, in successive sweep in wide circles. Apart from this, only pilots trained as carefully as prizefighters can cut corners at high speed. So far there is not the slightest evidence that anything like the ultimate speed limit has been reached. One British engineer has examined this question with some care and predicts a speed of 740 miles an hour within a generation.

High accelerations must be feared than continued high speed. What high accelerations mean is driven home when an automobile is taken with a lurch. The body is flung against the back of the seat. In a 5,000-mile-an-hour machine, the starting acceleration might be so high that the passengers would be squeezed into a pug against a vertical partition as if by an invisible hand of gigantic power. But if slow starts are possible, there is no reason for any speed limit on the straightaway flight.—New York Times.

Cold Weather Lowers Egg Production

Storage Holdings Less At First Of Year Than At Same Period In 1931

Relief for the heavy stocked eastern egg market is expected to follow the advent of wintry weather in Manitoba and Saskatchewan, states a report of the Dominion Department of Agriculture.

British Columbia and Alberta, where milder conditions prevail, have had very heavy production and prices have been brought down to new lows for the season. In the coast province, due to low egg values, marketing of hens has increased appreciably. Preliminary reports of storage holdings on January 1 at Montreal, Toronto and Winnipeg indicate total stocks of 2,135,900 dozen eggs, considerably below the figures for the same period of 1931.

War On Billboards

Freeing Streets Beautiful From One Of The Worst Forms Of Pollution

Since the beginning of the present calendar year, when New Jersey's billboard law went into effect, the Jersey landscape has been improved by the disappearance of about 20,000 billboards. Some persons who had erected billboards abandoned them and authorized the state authorities to remove them. Others did not apply for licenses. Many billboards have been removed to less objectionable locations and many persons have ceased to use this form of advertising. On the other hand, some billboards have been converted to billboards to remove them. Others did not apply for licenses. Many billboards have been removed to less objectionable locations and many persons have ceased to use this form of advertising. On the other hand, some billboards have been converted to billboards to remove them. Others did not apply for licenses. Many billboards have been removed to less objectionable locations and many persons have ceased to use this form of advertising.

For filling an aquarium, water should preferably be taken from a stream, spring, or deep well as water from reservoirs often contains chlorine or other chemicals.

The Chinese art of carving jade is known to have originated before the year 2000 B.C.

"You must treat me with respect as I am to a certain extent your employer."

"How is that?"

"I was just through a pall of rubbish on the pavement."—Lustige Rheiter, Berlin.

"And has your happy lesson to talk yet?"

"My yes! We're teaching him to keep quiet now."

M. N. U. 1935

British Coal

Should Be No Objection To Increased Imports Of Anthracite

There should be no objection to increased imports of British anthracite coal into Canada, officials of the Mines Department have said in commenting on a London cable in which it was forecast that this subject would be on the agenda of the forthcoming Imperial Conference. The problem in the past it was stated was the difficulty in profitably bringing British coal to Canada because of the lack of return cargo for the coal-carrying vessel. It was also suggested that that would be more storage space required on this side if the imports were to be increased.

The London Morning Post said the agenda of the Imperial Conference would include the question of how far Canada would go in taking British coal in return for increased wheat shipments under the proposed quota plan of the National Government.

This same subject was brought up by Sir John J. H. Thomas, Secretary for the Dominions when he was in Canada two years ago and at that time he declared that Canada should be prepared to absorb more British coal which would be brought over by the "return" cargo. It would carry Canadian wheat to the Old Country. Imports of British coal have been increasing but at that only one ton of coal was imported from Great Britain. The other twelve tons from the United States whose exports to Canada in 1931, were about 13 million tons. It is felt this should go to England.

Drink Milk For Good Teeth

Milk Is High In Calcium and Is a Good Tooth Builder

That good teeth have a direct bearing on good health and that defective teeth may lead to serious illness, are two well-established facts. Medical authorities are stressing today more than ever before, the importance of building strong teeth and of maintaining them in good condition by eating the proper foods by keeping them thoroughly cleaned, and by having them examined periodically by the dentist.

The minerals necessary for good teeth are, fortunately, supplied in a diet which is abundant in foodstuffs. Milk, high in calcium, stands first as milk, high in calcium, stands first as the chief tooth builder and it is of vital importance that the diet of both children and adults should include a sufficient amount of this food to supply the calcium requirement. There will be a direct result of a deficiency if milk is served as a beverage, particularly for children, and generally used in the making of cream soups, custards and vegetable dishes and milk desserts.—Department of Agriculture, Ottawa.

Eels For Holiday Fare

Live Eels Captured In St. Lawrence River Sent To New York

Thousands of live eels captured in the St. Lawrence were sent to New York to serve as Christmas fare for the large Italian element in that city. Reports from the community were that the Italian community were in a high fever of excitement over the arrival of the eels. They lined up with herbs and olive oil, they served with the best red wine that their connoisseurs permit. From the time an eel is hatched it is two and a half years before it reaches the St. Lawrence from the spawning beds a mile down in the Saguenay Sea.

German Boat Sold The gunboat "Panther," which represented the former Kaiser's "imperial fleet," was put up at public auction yesterday and knocked down to a Frankfurt bidder for \$9,515. Bidding started at \$750.

With shipping in a sad state of depression, there is little likelihood that the ex-ma-of-war will be converted into a cargo boat, probably she will be broken up. Since the end of the war and until recently, the "Panther" was used as a survey vessel in the German navy.

Vancouver's Mortality Mortality Vancouver's maternal mortality rate last year of 2.9 per 1,000 live births was the lowest in history, and the infant mortality rate of 23.3 per 1,000 was only slightly higher than the 1930 record of 22.6, it was learned from figures prepared by the health department. The 23 maternal toll compares with 43 in 1930 and 43 in 1929. Thirteen mothers died in childbirth in the year.

"And has your happy lesson to talk yet?"

"My yes! We're teaching him to keep quiet now."

M. N. U. 1935

AFTER THE VATICAN LIBRARY CRASHED

Further Search Of The Vatican Library

This picture shows the scene of the collapse of the roof in the famous Vatican Library after the majority of the debris had been removed. Five persons lost their lives here when the historic structure crashed, and fifteen thousand volumes, including works of incalculable value, were lost or damaged in the accident. Almost immediately 250 men were put to work salvaging the books and repairing the damage.

The world can be said to be suffering more from over-production than under-production. This opinion was expressed in an emphatic manner by Dr. J. E. Lattimore, professor of Agricultural Economics at Macdonald College, St. Anne de Bellevue, in a report delivered here on "Some Aspects of the Agricultural Situation."

Farming was not in quite as sorry a predicament as some other industries because the volume of business was fairly well maintained Dr. Lattimore said. As an industry, however, it had almost purchasing power for manufactured goods at present adjustment, of prices before entering the market as a buyer. This was largely from compulsion, he continued, but also partly from necessities at the present price discrepancy. Hence there was the alternative still open to many industries of either lowering their prices or taking their punishment in unemployment, Dr. Lattimore said.

Farming and Depression Work For Horse-Shoers

Shoing Shops In Montreal Are Still Flourishing

In these days of motors, horse-shoing has practically become a lost art in the large cities of Canada. In Montreal, however, there can still be found a few independent blacksmiths besides those employed by large companies such as the railways and breweries, who do their own work.

According to the proprietor of one of these establishments which looks much the same as it did when the coach and four was at its heyday, the shoeing of horses is an active commerce as the steeds wear out rapidly on the hard city pavements.

From three weeks to a month is about their usual duration. Some horses, particularly the heavy draft type, are quite hard on their feet and frequently require a change of steel shoes long as the door-to-door deliveries are made by baking, laundry and grocery concerns, the horse will remain an integral part of the city's commercial life, he believes.

New Method Of Keeping Honey Fresh Valuable Discoveries Made By National Research Council

Maple syrup is to 20 times as strong in flavor, and honey that will not spoil through fermentation, are new practical achievements according to a recent announcement by the National Research Council. Scientists have been working on these subjects for some time and the improvement desired in the maple sugar and syrup industry has been attained, the announcement stated, while the means of measuring the water content of honey and thereby providing a measure of protection against spoilage, is being worked out satisfactorily.

These discoveries are expected to prove of considerable value as the annual production of maple sugar and syrup in Canada is normally worth about \$6,000,000, while about 30,000,000 pounds of honey is an average yearly output.

Vices are among the oldest things on earth and yet it is not until chronic the loss of a single one.

It is likely 'planes will be used by the forces set up by the government to detect the poachers.

Widespread In Cree Indian Area Near James Bay Evidence of "fur poisoning" has been discovered in connection with poaching operations reported widespread in the Cree Indian area near James Bay, according to officials of the Ontario Department of Game and Fisheries. Working through the Royal Canadian Mounted Police, provincial authorities are moving toward putting an end to the illegal trade, carping and with the assistance of airplanes.

It is likely 'planes will be used by the forces set up by the government to detect the poachers.

Warms Of War A three-cornered conflict, involving Japan, China and Russia was foreseen by Dr. T. Z. Koo, Chinese vice-chairman of the World Student Christian Federation, who arrived in Montreal for a lecture tour of Eastern Canada. The well-known Chinese scholar expressed the opinion that the three great Oriental powers were slowly drifting into "what may prove to be a very serious conflict."

Several sports receive subsidies from the French Government. The highest sum is about \$11,450 given to encourage rifle-shooting and the lowest, \$80, is for baseball.

Lady (entering shop)—"What do your envelopes run at now?" Smart Salesman—"They don't run, ma'am; they stallionary."

Huge electric light bulbs have been put on a Los Angeles highway to enable auto racing at night.

"I suppose you've heard rumors that I'm engaged to Peggy?" "Yes. If it's true, I congratulate you; if not, I congratulate Peggy."

Saskatchewan Seed Fair

Out Championship Awarded To H. G. Newell Of Oshawa

Further awards of the Saskatchewan Provincial Seed Fair at the University of Saskatchewan gives the championship in oats to H. G. Newell of Oshawa, Sask., for a 47 1/2 bushel. C. H. Gilbert, of Big River, took second place with a 44 1/2 bushel. Victory, weighing 39 pounds per bushel. In early varieties of oats, George Avery, of Kelso, took first place, in the barley class, H. A. Kuyert, of Vancouver, had first place in the two-rowed class, and Cecil Trowell, of Saltcoats, first place with a six-rowed class.

In white potatoes, M. G. Trowell, of Saltcoats, took first place with a sample of Gold Nugget, and J. Whitehead, of Saskatoon, headed the early Oshawa class. In the Green Mountain group, H. J. Davis, of Edinburg, led, while Jas. Whitehead was first in the Russell Burbank group and in potatoes of any other variety.

Dr. J. H. Harrington announced that the University of Saskatchewan expected to put out a selection of Peiffer durum wheat that would be as smooth and uniform as Minnesota.

Man's Chemical Composition

The Stuff That Humanity Is Made Of Is Homologous

Dr. T. E. Lawson's prescription for a man has known some interesting tales:

Enough water to fill a ten-gallon barrel.

Enough fat for seven bars of soap.

Carbon for 9,000 lead pencils.

Phosphorus to make 2,700 matches.

Magnesium for one dose of salts.

Iron to make one medium-sized nail.

Sufficient lime to whitewash a chicken coop.

Sulphur enough to rid one dog of fleas and get a hundred other village ills, according to any arrangement the ingredients. A puglist, no doubt, will require a little less, but that is the stuff of humanity. Item No. 3 seems to indicate that man is predestined to authorship.—London Observer.

Cold Storage Food

Diversified Holdings In Cold Storage In Canada At Beginning Of Year

Canada opened the year with large and diversified food holdings in cold storage. Butter holdings totalled 25,913,390 pounds, compared with 22,171,313 pounds on January 1, 1931. Holdings of eggs dropped from 8,657,000 dozen last year to 7,280,400, but pork holdings were about double. Cattle holdings dropped from 16,398,500 pounds last year to 11,567,100 pounds, and beef from 11,225,100 to 9,853,400 pounds.

Poultry of all kinds numbered 13,345,700, compared with 7,560,500 last year. Fish holdings totalled 18,967,600 pounds, as against 31,777,100 last year.

Peaching Operations

Widespread In Cree Indian Area Near James Bay

Evidence of "fur poisoning" has been discovered in connection with poaching operations reported widespread in the Cree Indian area near James Bay, according to officials of the Ontario Department of Game and Fisheries. Working through the Royal Canadian Mounted Police, provincial authorities are moving toward putting an end to the illegal trade, carping and with the assistance of airplanes.

It is likely 'planes will be used by the forces set up by the government to detect the poachers.

Race For Height

Empire State Building In New York Wins Title Of Highest Office Building

At the dedicatory exercises, held on the 60th floor of the Empire State Building, in New York, which soared 1,250 feet into the sky of midtown Manhattan, Mr. R. H. Shreve, associate architect, revealed some of the astounding features of a structure that is victor in the race for height.

Mr. Shreve stated that the Empire State Building weighs some 600,000,000 pounds. Furthermore, as reported in the New York Times:

It is computed, however, that the great bulk weighed no more than 45 foot rock pile that might cover its site.

"He explained that 210 columns supported the burden of the building, and that the structure was vertical within a variation of five-eighths of an inch.

"The load was distributed so evenly that the weight on any given square inch of the floor was about the same as the weight of a French hen, he declared."

A. Starrett, head of the construction company which completed the building in less than a year from the day on which the first of the 210 columns "legs" on which it stands was installed, revealed further interesting facts. As reported in the New York Times:

"Three hundred tons of chromalite steel were used in the pier truss of the building, and 400 tons of aluminum were used to make the spandrels or panels under the windows and in the mooring-mat exterior."

"About 200,000 cubic feet of limestone, of which the building exterior is composed, were used, and 10,000,000 pounds of steel were used in the structure."

The four hundred windows were in the structure.

Has the limit been reached? How long will this building, which is 100 feet higher than the Empire State Building, retain its supremacy as the highest building ever erected by man?—The New York Times.

Really man agree that the office skyscrapers of today have approached the limit of economic practicality to height.

Potato Disease

Circular Issued In Colors Showing Wide Range Of Effects

A special circular showing in natural colors a range of thirty-six potato diseases, with a precise glossary of identification and description, has been prepared under the direction of the Dominion Botanist, Dr. H. T. Gussow, which should prove of inestimable value to potato growers and farmers throughout Canada.

From the illustration supplied in natural colors anyone can recognize a faulty tuber and thus guard against serious loss through planting diseased seed. The most effective way in which to guard against serious losses from disease is to use only bona fide Canadian certified seed potatoes. Published by direction of the Hon. R. B. Watt, Federal Minister of Agriculture, this circular is available without cost to Canadian farmers on application to the Publications Branch of the Department at Ottawa.

Poor Opinion Of Professor

Prof. T. W. Isherwood, of Wycliffe College, Toronto, deplores the decline of the romantic spirit and to support his belief he tells the story of a little boy, aged about nine, who asked: "Mr. Isherwood do you believe in Santa Claus?" To which he replied: "Well, the little boy retorted, 'You must be dumb.'"

"I suppose you've heard rumors that I'm engaged to Peggy?" "Yes. If it's true, I congratulate you; if not, I congratulate Peggy."

"I suppose you've heard rumors that I'm engaged to Peggy?" "Yes. If it's true, I congratulate you; if not, I congratulate Peggy."

"I suppose you've heard rumors that I'm engaged to Peggy?" "Yes. If it's true, I congratulate you; if not, I congratulate Peggy."
